

Medical Affairs

Labcorp Oncology Medical Affairs brings the **promise of precision medicine** for cancer care within reach for all.

Medical services available

- Real-time, peer-to-peer clinical consultation for report interpretation and support
- Field Medical science liaison (MSL) team for local support, genomic account reviews and ongoing education
- Educational resources from our medical and scientific teams ranging from molecular tumor boards (MTBs), research collaborations and educational webinars

Meet our team

- Board-certified pathologists and oncologists
- Genomic scientists
- Medical science liaisons

Molecular tumor boards (MTB)

The Labcorp Medical Affairs team can support your practice with local multidisciplinary MTBs, unbiased education and peer-to-peer collaboration to facilitate optimal **translation of complex genomic testing results** into clinical recommendations.

To join our monthly Labcorp Oncology MTB, sign up here:

MSL support and Genomic account reviews

The oncology MSLs are scientific subject-matter experts with deep knowledge of comprehensive genomic profiling and provide tailored support, including:

- **Expert consultations** on report interpretations and support
- **Educational support and training** about products and latest advances
- **Clinical and research collaboration** for ongoing and planned oncology clinical trials
- **Data insights** through regular genomic account reviews
